

## **BARCODE GENERATOR - MAGENTO 2**

### **INSTALLATION GUIDE**

## **Table Of Contents**

<b>Installation.....</b>	<b>3</b>
<b>option1.....</b>	<b>3</b>
<b>option2.....</b>	<b>4</b>

## Installation:

There are two ways of installing extension in magento2.

- 1) Using COMMAND LINE.
- 2) Manually install extension.

### Option 1: Magento 2 install extension using COMMAND LINE (Recommended).

Follow below steps to install extension from the command line.

**Step 1:** Install **laminas-barcode** library using below command.  
( require this in magento 2.3.x or 2.4.x only )

**:- composer require laminas/laminas-barcode:\***

```
root@rtpc71-HP-Compaq-Pro-6300-SFF:/var/www/html/magento237# composer require laminas/laminas-barcode:*
Do not run Composer as root/super user! See https://getcomposer.org/root for details
Warning from https://repo.packagist.org: Support for Composer 1 is deprecated and some packages will not be available. You should upgrade to Composer 2. See https://blog
.packagist.com/deprecating-composer-1-support/
./composer.json has been updated
Loading composer repositories with package information
Warning from https://repo.packagist.org: Support for Composer 1 is deprecated and some packages will not be available. You should upgrade to Composer 2. See https://blog
.packagist.com/deprecating-composer-1-support/
Updating dependencies (including require-dev)
The "http://repo.packagist.org/p/symfony/service-contracts%24b2d8f945c17b3ee9197ef56133c242afa899542c9295611fadd097b68a32c9d2.json" file could not be downloaded (HTTP/1
.1 502 Connection refused)
http://repo.packagist.org could not be fully loaded, package information was loaded from the local cache and may be out of date
Package operations: 1 install, 0 updates, 0 removals
  - Installing laminas/laminas-barcode (2.8.2): Loading from cache
laminas/laminas-barcode suggests installing zendframework/zendpdf (ZendPdf component)
Package container-interop/container-interop is abandoned, you should avoid using it. Use psr/container instead.
Package csharp/vault-php-guzzle6-transport is abandoned, you should avoid using it. No replacement was suggested.
Package flow/jsonpath is abandoned, you should avoid using it. Use softcreatr/jsonpath instead.
Package fzaninotto/faker is abandoned, you should avoid using it. No replacement was suggested.
Package laminas/laminas-console is abandoned, you should avoid using it. Use laminas/laminas-cli instead.
Package phpunit/php-token-stream is abandoned, you should avoid using it. No replacement was suggested.
Package sebastian/finder-facade is abandoned, you should avoid using it. No replacement was suggested.
Writing lock file
Generating autoload files
84 packages you are using are looking for funding.
see the "composer fund" command to find out more!
PHP CodeSniffer Config installed paths set to /var/www/html/magento237/vendor/bin/phpcs, /var/www/html/magento237/vendor/bin/phpcsfixer, /var/www/html/magento237/vendor/bin/phpcompatibility/php-compatibility
root@rtpc71-HP-Compaq-Pro-6300-SFF:/var/www/html/magento237# sudo chmod -R 777 *
```

**Step 2:** Download the extension and unzip it.

**Step 3:** Upload it to code directory in your magento installation's app directory.  
If code directory does not exists then create.

**Step 4:** Disable the cache under System → Cache Management.

**Step 5:** Enter the following at the command line:  
`php bin/magento setup:upgrade`  
`php bin/magento setup:static-content:deploy`

**Step 6:** Once you complete above steps log out and log in back to the admin panel and switch to Stores → Configuration → Mageants → **Barcode - Generator**.

The module will be displayed in the admin panel.

## Option 2: Magento 2 install extension manually.

**Step 1:** Install **laminas-barcode** library using below command.  
( require this in magento 2.3.x or 2.4.x only )

**:- composer require laminas/laminas-barcode:\***

```
root@rtpc71-HP-Compaq-Pro-6300-SFF:/var/www/html/magento237# composer require laminas/laminas-barcode:*
